Subject: New Employee Orientation

Hi Michael, appreciate all the efforts to improve new employee orientation. Personally I felt like my orientation was strictly a "firehose" approach. Lots of IT stuff. The person to brief benefits wasn't even there that day. Lots of quick mentions of updating things like the X-500 (we didn't have a clue what that was). Email and computer setup wasn't ready. If we need to extend the length of the orientation in order to cover required topics in a sensible, logical way, then do it. Having the opportunity to review critical areas on-line prior to reporting to work will drastically improve the process. Thanks, Larry
